The Dealership Analysis Program

Steady growth depends upon a few key factors. The first of these factors is a thorough understanding of the strengths, weaknesses, opportunities and threats that face your dealership. In order to set a goal you must be certain where you are and what needs to be done to achieve the goal.

The Dealership Analysis Program helps dealers do just that. It puts its fingers on the exact areas that, when handled, result in maximum growth of your dealership. The program literally "lifts the hood" on your business to identify the areas of your operation that may be slowing or preventing the achievement of your goals and purposes. It also finds, validates and strengthens those areas that are going well and are contributing to your success.

We'll look at your overall goals, installed base, key business statistics, profitability, cash flow, productivity, marketing plans, staff attitudes and more. You will have four web/phone consultations with a senior consultant and will receive a binder with a full write up of the findings. The result: a fresh, workable blueprint for maximizing potential.
